

MonoBehaviour

IPlayerRespawnListener

PointStar

```
graph BT; PointStar --> MonoBehaviour; PointStar --> IPlayerRespawnListener;
```

The diagram illustrates a class hierarchy and interface implementation. At the bottom is the 'PointStar' class. Two arrows originate from the top of the 'PointStar' box: one points to the 'MonoBehaviour' class box on the top left, and the other points to the 'IPlayerRespawnListener' interface box on the top right. This indicates that 'PointStar' inherits from 'MonoBehaviour' and implements the 'IPlayerRespawnListener' interface.
